

CARBON CREDIT SUPPORT SERVICES

VALIDATION & VERIFICATION BODY

ALL CONSULTING: YOUR PREFERRED VALIDATION AND VERIFICATION BODY (VVB)

ALL Consulting, a recognized pioneer in the carbon credit marketplace, serves as a respected Validation and Verification Body, providing independent third-party assessment, approval, and validation of carbon credit projects. We recognize our crucial role in ensuring the credibility and accuracy of emissions reductions claims while consistently building trust in the carbon market. As your VVB of choice, we serve two primary functions:

- **Validation** – We assess to ensure your project meets the eligibility criteria and requirements set by current carbon credit registry standards (such as CarbonPath and BCarbon). This process includes the critical review of project documentation, adherence to methodologies, and validate baseline calculations. Once confirmed, we certify the project design, enabling it to generate future carbon credits if the project is successfully implemented.
- **Verification** – Once validation is complete, ALL Consulting performs thorough, independent assessments to verify the actual emission reductions achieved by projects. Our verification process includes examining monitoring methods, data retention, and emissions calculations, all critical steps to assure accurate results and qualify for certified emissions reductions.

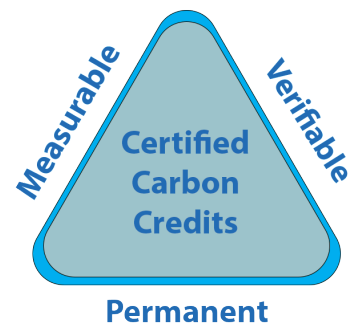

VVB STANDARDS AND CRITERIA FOR APPROVAL

Validation and Verification Bodies are approved by individual carbon standards organizations, including:

- CarbonPath
- BCarbon
- American Carbon Registry (ACR)

To qualify, VVBs must demonstrate expertise in carbon accounting and auditing, follow rigorous methodologies, and comply with international standards set forth by the methodologies. such as ISO 14065.

THE BENEFITS OF USING ALL AS YOUR VVB

- **Credibility:** ALL's independent verification boosts market confidence, and ensures accurate and reliable accounting of credit values.
- **Transparency:** We provide transparent and standardized assessments, creating consistent benchmarks for projects.
- **Market Access:** Projects verified by approved VVBs are more likely to attract buyers, increasing your project's viability.

WHY ALL?

ALL Consulting serving as your **Verification and Validation Body** can play a vital role in the integrity your project within the carbon credit marketplace. By providing third-party validation and verification, ALL can provide credibility to the process of emission reductions, offering confidence to investors and promoting genuine environmental impact.
